Online submission for **Brisbane City Local Government Area** from **Kylie Harber**

Submission Details

Name: Kylie Harber

Submission Text : To Whom It May Concern, I am writing to provide comment on the new proposed boundaries concerning Camp Hill. Dividing the surburb of Camp Hill into three different wards is unfortunate for the close knit community in this area. The businesses and residents in this area are passionate about their community and being considered holistically in political matters. As a resident [REDACTED] I am far more connected to the community and ward of Coorparoo than I am any other surrounding area. Camp Hill is a unique and vibrant area and its urban fabric (density, scale, users) has a stronger connection to the Coorparoo Ward than any of the bayside or industrial suburbs. Camp Hill as a suburb deserves consistency and consideration as a whole community. This should be reflected in the boundaries. If the entirety of Camp Hill cannot be included in the Coorparoo ward, I would like to propose that the following area should be part of the Coorparoo ward: - east of Boundary Road - south of Old Cleveland Road - west of Jones Road, Carina - north of Whites Hill. Thank you.

Regards, Kylie

Subject: LGA Divisional Boundary Review - Annerley

Dear Sir/Madam

I write in relation to the proposed determination report of the Brisbane City LGA Divisional Boundary Review.

I live in Annerley, and strongly oppose the splitting of my suburb between three different wards. More concerning however, is the continued inclusion of parts of Annerley in a ward (Coorparoo) that is centred around communities of interest east of the Pacific Motorway.

Annerley is a community that is centred around Ipswich Road and is closely connected with Moorooka and other surrounding suburbs west of the Pacific Motorway.

While I understand the Commission must make decisions that see suburbs split between wards to create wards with similar numbers of electors, the 10% allowable variance should be used to ensure communities of interest are kept together. Splitting Annerley between three wards to simply make up the numbers is not acceptable.

I submit that the Local Government Change Commission, at a minimum, transfer the areas of Annerley currently contained in the draft Coorparoo Ward, into the Moorooka Ward and/or Tennyson Ward.

There are two feasible ways in which this could be done:

Option 1:

- Transfer SA1s: 3105201/3105202 (area bound by Cornwall St, Pacific Motorway, Victoria Terrace and Ipswich Rd) from Coorparoo Ward into Tennyson Ward. These areas were in the Tennyson Ward prior to the 2015 Boundary Review.
- Transfer SA1s: 3105203/3105204/3105205/3105206/3105207 (area bound by Victoria Terrace, Pacific Motorway, Annerley/Tarragindi suburb boundary, Waterton Street and Ipswich Road) from Coorparoo Ward into Moorooka Ward.

Option 2:

- Transfer all parts of Annerley in the proposed Coorparoo Ward to Moorooka Ward.

Both of these options see Tennyson and Moorooka remain within the allowable variances from average enrolment in 2019 and 2024. While they would see Coorparoo Ward fall more than 10% under the average, I am sure the commission could make other changes to see that the ward is within the accepted range.

I strongly urge the LGCC to consider this submission and ensure that the final boundaries keep communities of interest together.

Yours sincerely

Alison Prescott
Annerley Resident

Subject: Forest Lake Ward

Dear electorate commission,

I received a letter in my letterbox today asking me to send you all a letter or email to object to the change of moving Richlands from the Inala and Forest Lake area.

Not only was the letter riddled with spelling mistakes but it mentioned that people wouldn't be able to get to the new ward and was rather uneducated. Personally it is beyond me why anyone living in Richlands would object to this very positive change. I personally live in [REDACTED] which is part of Richlands and would welcome this change with open arms. Richlands is a developing area with new estates popping up everywhere and is on the move. If only the train station parking situation can be sorted it will be the perfect new suburb. Apparently the empty Masters is being developed into retail outlets.

Kindest regards,

Kerstin Hartmann [REDACTED]

Subject: Carseldine Redistribution

Hi,

I have just heard that there are plans to split the suburb of Carseldine in half and redistribute it to McDowall and Bracken Ridge.

As a long time resident of Carseldine I object strongly to this redistribution and I'm sure that this is the view of most other residents. It is interesting that there has been little/no publicity about this from either local government representatives or our local state member.

I would have thought that such a matter of this would be of interest to the electorate and should be widely publicised but I guess this is not the case. No matter, I'm sure there will be repercussions in the next election.

Submission Text : My main focus is that the Mt Gravatt Outlook Reserve and the Mt Gravatt Showgrounds have been separated into the Ward of MacGregor and split from the suburb of Mt Gravatt which remains in the Ward of Holland Park. The mountain is such an iconic part of Mt Gravatt Central and has community focus with Mt Gravatt central business district. The street access (Shire Road) to the mountain remains in the Holland Park Ward boundary. The reserve is named the Mt Gravatt Outlook Reserve which would indicate it should be linked with the suburb of Mt Gravatt. Having these two important community localities attached the suburb of Mt Gravatt and contained in the same Ward would not alter the voter numbers of the Ward. The Mount Gravatt Outlook Reserve has a long history with the local community including the Mt Gravatt Historical Society, Mt Gravatt Environment Group and currently the Hope Foundation who operate the LoveWell Café on the mountain.

Subject: SAVE RICHLANDS

Dear Mr Vidgen,

I write to you regarding the proposed boundary changes to the Brisbane City Council LGA, in particular Forest Lake Ward.

While I understand the Commission's desire to ensure equal demographic and population distribution between wards, this change does not suit the natural geographic and infrastructure layout of the region - Jamboree Ward would now jump the Ipswich and Centenary Motorways just to take in the suburb of Richlands - and is needlessly confusing for residents, particularly given Forest Lake Ward is the successor to the former Richlands Ward.

I strongly urge the Commission to reconsider this particular element of the redistribution and ensure that our Southside and Westside communities are kept united.

Kind Regards,

Subject: Draft boundary redistribution

Dear Commissioners,

I write with regard to the draft boundaries for the Bracken Ridge Ward.

As a former Councillor, in the 1990's I wish to raise concern about the proposal to split Carseldine into two wards. While I know longer live in the area I do retain a strong interest in the community I represented.

Carseldine was a suburb primarily developed in the 1980's and 90's with some development still occurring.

During my time as Councillor from 1997 until 2007, Carseldine was always contained within the Bracken Ridge Ward.

Carseldine residents use Gympie Road as their primary north-south transport route into and out of their suburb. This is in contrast to McDowall ward residents who use the Bridgeman Road/Beckett Road corridor and to a lesser extent Gympie Road. This position has been further enhanced through the road upgrade at Bridgeman Road since my retirement.

Public transport services that traverse the Carseldine area are also primarily linked to Bracken Ridge and other suburbs in Bracken Ridge ward - not Bridgeman Downs and the other McDowall Ward suburbs.

I understand that the commission attempts to retain whole suburbs where possible. By splitting Carseldine the commission goes against this intent. Also, the splitting of Carseldine does not help reunite any other suburb.

I also note that the changes to Carseldine facilitate changes to Marchant and McDowall Wards, however, importantly, if the commission does not make the changes proposed to Carseldine there are not unacceptable impacts to quotas on any of these three wards.

For these reasons, I consider the changes to Carseldine do not enhance the community of interest for any of these wards and simply create unnecessary elector disruption to residents who have existing long term connection in their current wards.

I ask you to reconsider splitting up Carseldine.

Yours faithfully,

Carol Cashman

Cc: TheGabba Ward Office
Subject: Boundary Review Proposal for BCC

Hi team,

I write to submit brief comments regarding the Review Documentation for the Brisbane City Council boundary review proposal.

My comments are primarily related to the desire to keep suburbs and communities of interest intact where possible. As a councillor, I'm mindful that communication with residents – particularly postal communication – is very often based on the suburb a resident lives in. The nature of bulk mail services – whether Australia post or private businesses – is that they usually structure delivery services according to suburb, so that where a few streets of a particular suburb are on the 'wrong' side of a ward boundary, they are likely to miss out on important communication from their local councillor.

Situations where ward boundaries do not align neatly with suburb boundaries also create unnecessary voter confusion as to which electorate they live in, increasing the risk of voter disenfranchisement when residents don't know who their candidates or councillor are.

The proposed eastern boundary of the Gabba Ward follows Wellington Road in what seems at first glance to be a clean, straight line, seeking to split the suburbs of Kangaroo Point and East Brisbane. However the East Brisbane suburb boundary includes the properties along both sides of Wellington Rd, and the residences immediately on the western side of Wellington Rd have a postal address suburb of 'East Brisbane'. As a councillor, I will have the capacity to mail out a bulk newsletter to Kangaroo Point, but I would not be able to include the one or two-dozen East Brisbane mailing addresses within this mailout. Thus, those East Brisbane residents are likely to miss out on essential local communication.

Drawing the ward boundary directly along Wellington Rd also creates a situation where two councillors (rather than one) would share responsibility for traffic planning, pedestrian safety and maintenance issues along this corridor, such as where to install new pedestrian crossings, or how often to resurface the road, increasing the risk that this road corridor will be neglected or deprioritised by both councillors due to its "no man's land" status.

Recommendation: Adjust the proposed eastern boundary of the Gabba Ward to align with the suburb boundary of East Brisbane, so that all East Brisbane residents are clearly within the Coorparoo ward, rather than creating a confusing situation where 99% of East Brisbane residents live in the Coorparoo Ward while a forgotten minority are actually still within the Gabba Ward.

The south-east corner of the proposed Gabba Ward extends to include the PA Hospital site. However the PA hospital is understood locally to be part of the Buranda locality (the rest of Buranda is to be shifted into Coorparoo ward) and is more directly connected to the shops, services and hospital accommodation to the east, within the proposed Coorparoo ward. The train lines through Dutton Park represent a significant geographic boundary between Dutton Park and the PA hospital site, and these two precincts have very distinct local identities and communities of interest.

The impacts of the PA hospital on its surrounding locality – such as traffic and street parking, land use etc – are also carried by the streets to the east in Buranda/Woolloongabba. It would thus be more difficult to address local traffic planning issues if the hospital is in one ward, but the parking impacts caused by the hospital are in another ward. The PA hospital site has a relatively small number of local resident voters, so including it in one ward or the other makes little difference in terms of ward enrolment quotas, however from an administrative and transport planning perspective, it is much more efficient and logical for the PA hospital to be in the same ward as Buranda Village.

Recommendation: Adjust the south-east boundary of the Gabba Ward to follow the train line and the suburb boundary of Dutton Park, so that the PA hospital site falls entirely within the Coorparoo Ward.

The proposed southern boundary of the Paddington Ward appears to exclude roughly three streets of the suburb of Auchenflower (i.e. Park Avenue and parts of Bayliss St and Cadell St. This incongruity does not appear to be based on any clear rationale or need, and again results in a situation where 99% of Auchenflower residents would live within Paddington Ward while a small, forgotten minority remain in the Walter Taylor ward (which stretches all the way out to Chapel Hill and Fig Tree Pocket).

According to the proposed boundaries, by 2024, the projected number of voters in Walter Taylor ward will be slightly higher than the number of voters in Paddington Ward. And parts of Walter Taylor such as Toowong, St Lucia and Indooroopilly are likely to see much higher-than-anticipated population growth due to higher-density zoning. Thus, all else being equal, there would appear to be a greater benefit in keeping the suburb of Auchenflower wholly within the ward of Paddington.

Recommendation: Expand the southern boundary of the Paddington Ward to align with the suburb boundary of Auchenflower.

Thanks for considering these minor changes. Generally speaking, I am supportive of the proposed new boundaries of the Gabba Ward, though I remain of the firm view that the total number of wards and councillors in Brisbane needs to be increased to accommodate population growth, so that each councillor represents a smaller local community.

Regards,
Jonno

Jonathan Sri
Councillor for the Gabba Ward

To be truly radical is to make hope possible, rather than despair convincing.

Subject: Changes to Morningside ward

To Whom it may concern,

We do not support changes to Cannon Hill proposed by the Electoral Commission. We wish to remain in Morningside ward and not be put in the same ward as Murrarie as we are distinct communities. Everyone understands the logical boundary on Barrach Road as it is now. Please leave our community as it is.

Subject: (5405) Brisbane City Local Government Area - Annette Williams

Online submission for **Brisbane City Local Government Area** from **Annette Williams**

Submission Details

Name: Annette Williams

Submission Text : I object to the moving of Richlands to Jamboree Ward. There is a huge industrial estate and a 6 lane freeway separating us from Jamboree. The change would make it difficult for residents to visit their councillor's office and indeed such a change would not suit the natural geographic and infrastructure layout of the region. Therefore as a resident of Richlands I strongly urge the Commission to reconsider this particular redistribution.

Subject: LEAVE RICHLANDS ALONE!!!

Dear Charles Strunk.

This is refer to the subject as above,
as we advised that we are going to be no longer in Forestlake and Inala area.I disagreed with this decision.
We need your help here.

Thanks
Faye

Subject: Government proposal to split Carseldine suburb

Dear Sir,

I wish to raise an objection to the proposal to split Carseldine as a suburb. The proposal to split Carseldine (my half) to be part of EVERTON PARK is a link far away. If it has to happen why not ASPLEY which we were part of years ago or even Bald Hills. Everton Park is just ridiculous.

I object to the proposal on the following grounds:

- . No consultation with the community
- . Time of proposed introduction.
- . I have no idea what the benefits are to the ratepayer or community good or bad

Yours sincerely
Jim Waters

Subject: proposal to alter Carseldine boundaries

Change Commissioner
Local Government Change Commission
Dear Sir/Madam,

It has come to our notice that there is a proposal to split the suburb of Carseldine.

We object to any proposal to alter the suburbs boundaries and/or merge it into other suburbs.

Carseldine should stay in the one existing council area and not be cut in two, with half of it grouped with Everton Park and Stafford. **This divides our current community.**

We respectfully suggest that the existing boundaries remain in place.

Please keep Carseldine together !

Yours sincerely

John Heim

Subject: PROPOSED BCC BOUNDARY REDISTRIBUTION

Mr Pat Vidgen PSM
Electoral Commissioner
Electoral Commission of Queensland

Dear Mr Vidgen,

I write to you regarding the proposed boundary changes to the Brisbane City Council LGA, in particular Forest Lake Ward. I strongly object to this change of moving Richlands from the Inala and Forest lake areas. In the past you have already abolished the Richlands Ward. Why is it our turn again when numerous other Wards have been left untouched.

While I understand to some degree your desire to ensure equal demographic and population distribution between wards, this change does not suit the geographic and infrastructure layout of the region just to take in the suburb of Richlands. If this proposed change were to be put into effect the Jamboree Ward would be separated by a massive industrial estate and also would now jump the Ipswich and Centenary Motorways just to take in our suburb of Richlands. Many people in this area are elderly and the problems associated with a poor bus transport network would make it extremely difficult for these residents to visit their local Ward Office.

I strongly urge the Commission to reconsider this particular element of the redistribution.

Kind Regards,

Mal Jackson
