

C-19 Petition

Electoral Commission of Queensland
Level 20, 1 Eagle Street,
BRISBANE QLD 4000

To Whom It May Concern,

I would like to offer my support for the proposed changes to the divisional boundaries for Whitsunday Regional Council, which, for a number of reasons, will certainly be beneficial to the entire region.

Given the current projected growth forecasts by Whitsunday Regional Council over the next 4 to 5 years, these proposed divisional boundaries would accommodate for this growth whilst still maintaining the required quota figures for each division in line with the ECQ voter enrolment requirements.

Add to this, the majority of the projected growth to this area will undoubtedly be in the southern portion of the region, so this proposal allows for a much more even distribution of councillor representation to the shire overall.

Under the current divisional boundaries, the southern sector of the region is represented by 1 councillor, the northern sector of the region by 3 councillors and the coastal sector by 2 councillors. This has been the case since the amalgamation of the Bowen and Whitsunday Shires.

The new proposal sets the foundation for a much more "even playing field", with a potential for 2 councillors elected to each area. This allows for more evenly distributed councillor representation and the opportunity for more people in the community to contribute their ideas and support for growth and sustainability in our region.

Whitsunday Regional Council Mayor, Andrew Willcox has been extremely vocal and supportive of a "united" region since his election in 2016, and this proposal most definitely supports that vision and certainly brings no disadvantage to any part of our beautiful area. It's so very refreshing to see a proposal that ensures each division of the Council has a similar number of voters (quota), so that each person's vote has the same value, as well as supporting each person's fundamental right to equal representation. This brings about greater voter confidence in those elected in each division.

I would like to strongly suggest that this proposal be accepted by the Local Government Change Commission as soon as possible so that it may take effect prior to the March 2020 Local Government elections.

I would like to thank you for your time and as a Whitsunday Region community member, I appreciate the opportunity to support this fantastic divisional boundary proposal.

Sincerely,

To Whom It May Concern,

I would like to offer my support for the proposed changes to the divisional boundaries for Whitsunday Regional Council, which, for a number of reasons, will certainly be beneficial to the entire region.

Given the current projected growth forecasts by Whitsunday Regional Council over the next 4 to 5 years, these proposed divisional boundaries would accommodate for this growth whilst still maintaining the required quota figures for each division in line with the ECQ voter enrolment requirements.

Add to this, the majority of the projected growth to this area will undoubtedly be in the southern portion of the region, so this proposal allows for a much more even distribution of councillor representation to the shire overall.

Under the current divisional boundaries, the southern sector of the region is represented by 1 councillor, the northern sector of the region by 3 councillors and the coastal sector by 2 councillors. This has been the case since the amalgamation of the Bowen and Whitsunday Shires.

The new proposal sets the foundation for a much more "even playing field", with a potential for 2 councillors elected to each area.

This allows for more evenly distributed councillor representation and the opportunity for more people in the community to contribute their ideas and support for growth and sustainability in our region.

Whitsunday Regional Council Mayor, Andrew Willcox has been extremely vocal and supportive of a "united" region since his election in 2016 and this proposal most definitely supports that vision and certainly brings no disadvantage to any part of our beautiful area.

It's so very refreshing to see a proposal that ensures each division of the Council has a similar number of voters (quota), so that each person's vote has the **same value**, as well as supporting each person's fundamental right to equal representation and more importantly. This brings about greater voter confidence in those elected in each division.

Our friends and families who live in the current far-flung Division 4 have been represented, since amalgamation in 2008, by councillors who live in Collinsville.

The proposed changes to electoral boundaries will see voters of Lethebrook, Kelsey Creek, the Andromache, Lake Proserpine and Crystalbrook areas become part of the Proserpine-centred Division 3; while the voters of Dingo Beach, Hydeaway and Gregory River areas will become part of Division 5 which would include Strathdickie, Myrtlevalle, Mt Julian, Sugarloaf and Riordanvale.

These voters and their families will be represented by councillors in closer proximity to their areas who are more attuned to their immediate concerns. In addition, it will align them geographically with communities where they will have a greater voice on issues, particularly in their own localities.

A facebook post by the current Mayor Andrew Willcox yesterday (23rd September 2019) was extremely misleading and referenced a 6/0 unanimous decision by WRC Councillors to just adjust boundaries for Divisions 2 and 3.

I feel it's necessary to bring to your attention, that this decision was from a Council meeting held in February of this year, long before the current proposal was submitted. To date this current proposal has not even been to a WRC Council meeting and hasn't been put to a Councillor vote, a fact I confirmed through Council this morning.

I would like to strongly suggest that this proposal be accepted by the Local Government Change Commission as soon as possible so that it may take effect prior to the March 2020 Local Government elections.

I would like to thank you for your time and as a Whitsunday Region community member, I appreciate the opportunity to support this fantastic divisional boundary proposal.

This allows for more evenly distributed councillor representation and the opportunity for more people in the community to contribute their ideas and support for growth and sustainability in our region.

Whitsunday Regional Council Mayor, Andrew Willcox has been extremely vocal and supportive of a "united" region since his election in 2016 and this proposal most definitely supports that vision and certainly brings no disadvantage to any part of our beautiful area.

It's so very refreshing to see a proposal that ensures each division of the Council has a similar number of voters (quota), so that each person's vote has the **same value**, as well as supporting each person's fundamental right to equal representation and more importantly. This brings about greater voter confidence in those elected in each division.

I would like to strongly suggest that this proposal be accepted by the Local Government Change Commission as soon as possible so that it may take effect prior to the March 2020 Local Government elections.

I would like to thank you for your time and as a Whitsunday Region community member, I appreciate the opportunity to support this fantastic divisional boundary proposal.

Sincerely,

To Whom It May Concern,

I would like to offer my support for the proposed changes to the divisional boundaries for Whitsunday Regional Council, which, for a number of reasons, will certainly be beneficial to the entire region.

Given the current projected growth forecasts by Whitsunday Regional Council over the next 4 to 5 years, these proposed divisional boundaries would accommodate for this growth whilst still maintaining the required quota figures for each division in line with the ECQ voter enrolment requirements.

Add to this, the majority of the projected growth to this area will undoubtedly be in the southern portion of the region, so this proposal allows for a much more even distribution of councillor representation to the shire overall.

Under the current divisional boundaries, the southern sector of the region is represented by 1 councillor, the northern sector of the region by 3 councillors and the coastal sector by 2 councillors. This has been the case since the amalgamation of the Bowen and Whitsunday Shires.

The new proposal sets the foundation for a much more "even playing field", with a potential for 2 councillors elected to each area.

This allows for more evenly distributed councillor representation and the opportunity for more people in the community to contribute their ideas and support for growth and sustainability in our region.

Whitsunday Regional Council Mayor, Andrew Willcox has been extremely vocal and supportive of a "united" region since his election in 2016 and this proposal most definitely supports that vision and certainly brings no disadvantage to any part of our beautiful area.

It's so very refreshing to see a proposal that ensures each division of the Council has a similar number of voters (quota), so that each person's vote has the *same value*, as well as supporting each person's fundamental right to equal representation and more importantly. This brings about greater voter confidence in those elected in each division.

To Whom It May Concern,

I would like to offer my support for the proposed changes to the divisional boundaries for Whitsunday Regional Council, which, for a number of reasons, will certainly be beneficial to the entire region.

Given the current projected growth forecasts by Whitsunday Regional Council over the next 4 to 5 years, these proposed divisional boundaries would accommodate for this growth whilst still maintaining the required quota figures for each division in line with the ECQ voter enrolment requirements.

Add to this, the majority of the projected growth to this area will undoubtedly be in the southern portion of the region, so this proposal allows for a much more even distribution of councillor representation to the shire overall.

Under the current divisional boundaries, the southern sector of the region is represented by 1 councillor, the northern sector of the region by 3 councillors and the coastal sector by 2 councillors. This has been the case since the amalgamation of the Bowen and Whitsunday Shires.

The new proposal sets the foundation for a much more "even playing field", with a potential for 2 councillors elected to each area.

This allows for more evenly distributed councillor representation and the opportunity for more people in the community to contribute their ideas and support for growth and sustainability in our region.

Whitsunday Regional Council Mayor, Andrew Willcox has been extremely vocal and supportive of a "united" region since his election in 2016 and this proposal most definitely supports that vision and certainly brings no disadvantage to any part of our beautiful area.

It's so very refreshing to see a proposal that ensures each division of the Council has a similar number of voters (quota), so that each person's vote has the **same value**, as well as supporting each person's fundamental right to equal representation and more importantly. This brings about greater voter confidence in those elected in each division.

I would like to strongly suggest that this proposal be accepted by the Local Government Change Commission as soon as possible so that it may take effect prior to the March 2020 Local Government elections.

I would like to thank you for your time and as a Whitsunday Region community member, I appreciate the opportunity to support this fantastic divisional boundary proposal.

Sincerely,

To Whom It May Concern,

I would like to offer my support for the proposed changes to the divisional boundaries for Whitsunday Regional Council, which, for a number of reasons, will certainly be beneficial to the entire region.

Given the current projected growth forecasts by Whitsunday Regional Council over the next 4 to 5 years, these proposed divisional boundaries would accommodate for this growth whilst still maintaining the required quota figures for each division in line with the ECQ voter enrolment requirements.

Add to this, the majority of the projected growth to this area will undoubtedly be in the southern portion of the region, so this proposal allows for a much more even distribution of councillor representation to the shire overall.

Under the current divisional boundaries, the southern sector of the region is represented by 1 councillor, the northern sector of the region by 3 councillors and the coastal sector by 2 councillors. This has been the case since the amalgamation of the Bowen and Whitsunday Shires.

The new proposal sets the foundation for a much more "even playing field", with a potential for 2 councillors elected to each area.

This allows for more evenly distributed councillor representation and the opportunity for more people in the community to contribute their ideas and support for growth and sustainability in our region.

Whitsunday Regional Council Mayor, Andrew Willcox has been extremely vocal and supportive of a "united" region since his election in 2016 and this proposal most definitely supports that vision and certainly brings no disadvantage to any part of our beautiful area.

It's so very refreshing to see a proposal that ensures each division of the Council has a similar number of voters (quota), so that each person's vote has the **same value**, as well as supporting each person's fundamental right to equal representation and more importantly. This brings about greater voter confidence in those elected in each division.

I would like to strongly suggest that this proposal be accepted by the Local Government Change Commission as soon as possible so that it may take effect prior to the March 2020 Local Government elections.

I would like to thank you for your time and as a Whitsunday Region community member, I appreciate the opportunity to support this fantastic divisional boundary proposal.

Sincerely,

Name: Keith D Mathers

Given the current projected growth forecasts by Whitsunday Regional Council over the next 4 to 5 years, these proposed divisional boundaries would accommodate for this growth whilst still maintaining the required quota figures for each division in line with the ECQ voter enrolment requirements.

Add to this, the majority of the projected growth to this area will undoubtedly be in the southern portion of the region, so this proposal allows for a much more even distribution of councillor representation to the shire overall.

Under the current divisional boundaries, the southern sector of the region is represented by 1 councillor, the northern sector of the region by 3 councillors and the coastal sector by 2 councillors. This has been the case since the amalgamation of the Bowen and Whitsunday Shires.

The new proposal sets the foundation for a much more "even playing field", with a potential for 2 councillors elected to each area.

This allows for more evenly distributed councillor representation and the opportunity for more people in the community to contribute their ideas and support for growth and sustainability in our region.

Whitsunday Regional Council Mayor, Andrew Willcox has been extremely vocal and supportive of a "united" region since his election in 2016 and this proposal most definitely supports that vision and certainly brings no disadvantage to any part of our beautiful area.

It's so very refreshing to see a proposal that ensures each division of the Council has a similar number of voters (quota), so that each person's vote has the **same value**, as well as supporting each person's fundamental right to equal representation and more importantly. This brings about greater voter confidence in those elected in each division.

I would like to strongly suggest that this proposal be accepted by the Local Government Change Commission as soon as possible so that it may take effect prior to the March 2020 Local Government elections.

I would like to thank you for your time and as a Whitsunday Region community member, I appreciate the opportunity to support this fantastic divisional boundary proposal.

Sincerely,

Add to this, the majority of the projected growth to this area will undoubtedly be in the southern portion of the region, so this proposal allows for a much more even distribution of councillor representation to the shire overall.

Under the current divisional boundaries, the southern sector of the region is represented by 1 councillor, the northern sector of the region by 3 councillors and the coastal sector by 2 councillors. This has been the case since the amalgamation of the Bowen and Whitsunday Shires.

The new proposal sets the foundation for a much more "even playing field", with a potential for 2 councillors elected to each area.

This allows for more evenly distributed councillor representation and the opportunity for more people in the community to contribute their ideas and support for growth and sustainability in our region.

Whitsunday Regional Council Mayor, Andrew Willcox has been extremely vocal and supportive of a "united" region since his election in 2016 and this proposal most definitely supports that vision and certainly brings no disadvantage to any part of our beautiful area.

It's so very refreshing to see a proposal that ensures each division of the Council has a similar number of voters (quota), so that each person's vote has the **same value**, as well as supporting each person's fundamental right to equal representation and more importantly. This brings about greater voter confidence in those elected in each division.

I would like to strongly suggest that this proposal be accepted by the Local Government Change Commission as soon as possible so that it may take effect prior to the March 2020 Local Government elections.

I would like to thank you for your time and as a Whitsunday Region community member, I appreciate the opportunity to support this fantastic divisional boundary proposal.

Sincerely,

To Whom It May Concern,

I would like to offer my support for the proposed changes to the divisional boundaries for Whitsunday Regional Council, which, for a number of reasons, will certainly be beneficial to the entire region.

Given the current projected growth forecasts by Whitsunday Regional Council over the next 4 to 5 years, these proposed divisional boundaries would accommodate for this growth whilst still maintaining the required quota figures for each division in line with the ECQ voter enrolment requirements.

Add to this, the majority of the projected growth to this area will undoubtedly be in the southern portion of the region, so this proposal allows for a much more even distribution of councillor representation to the shire overall.

Under the current divisional boundaries, the southern sector of the region is represented by 1 councillor, the northern sector of the region by 3 councillors and the coastal sector by 2 councillors. This has been the case since the amalgamation of the Bowen and Whitsunday Shires.

The new proposal sets the foundation for a much more "even playing field", with a potential for 2 councillors elected to each area.

This allows for more evenly distributed councillor representation and the opportunity for more people in the community to contribute their ideas and support for growth and sustainability in our region.
